**SILVER QUEEN PROPERTY  
OWEN LAKE BC**

**New Nadina Explorations Limited  
Fact Sheet**

**Silver Queen Property (100%)  
Hidden Copper-Moly-Gold Porphyry  
discovered 2011**

1. High grade Silver Vein discovery: Open to depth and strike. Newly discovered section of NG3 epithermal vein. Further drilling planned to warrant decision on opportunity for underground production.
2. The large Itsit Cu-Mo-Au porphyry system discovered in 2011 remains untested for higher grade zones.

High grade molybdenum – REE potential

**Monument Diamond Project,  
Lac de Gras NWT 57.49%**

Monument, strategically located forms part of the Lac de Gras cluster occurring within 40 km of the Ekati and Diavik diamond mines awaits a JV partner. It contains twelve known diamond bearing kimberlites. RIP samples produced 2,201.7 kg of kimberlite yielded 955 diamonds including the largest diamond found to date from the Monument property weighing 0.445 carats. The DD17 kimberlite gave 964 diamonds from 2,137.6 kg of kimberlite.

**Directors & Management**

Ellen Clements - Director, President, CEO  
John Jewitt, P.Eng.. - Director  
William Meyer. – Director  
David R Huck - Director  
Arlene Ashton - CFO  
Gerald H. Rayner, P.Eng – Advisor  
Don MacIntyre, Ph.D., P.Eng. QP for Silver Queen project
